I urge you to reject the NAB's petition 04-160. I am a faithful satellite radio listener. I pay for this service and firmly believe I should be able to listen to local weather and traffic info. Unfortunately for me, weather and traffic is not yet available for my area. But, I am extremely hopeful it will be in the future. I do enjoy the availability of receiving this information in other areas when travelling. Public radio has gone long enough without competition. The result is that the average public radio is worthless. You either constantly hear the complaints of DJs or the sales pitch of advertisers. Even when the weather is bad you can not depend on local radio to give you worthwhile information. I make a monthly choice to pay for satellite radio so that I may hear what I want when I want. The National Association of Broadcasters has no right to tell me what I can pay to listen to. Since when do they have a monopoly over the air waves. I respectfully urge you to reject the NAB's petition 04-160.
